Space is limited

**D2L believes in educating and preparing the whole child to become a global citizen in his or her community. We aim to do just that through combining the ARTs to STEM-Science, Technology, Engineering, and Math by providing opportunities for students to discover, take thoughtful risks by engaging in experiential learning, applying in-depth knowledge of math and sciences, plus the ability to integrate and apply that knowledge to problem solve.*

***less than \$15.60 per hour*
